

WE AUTHENTICATE THE WORLD

---

# Network Radius

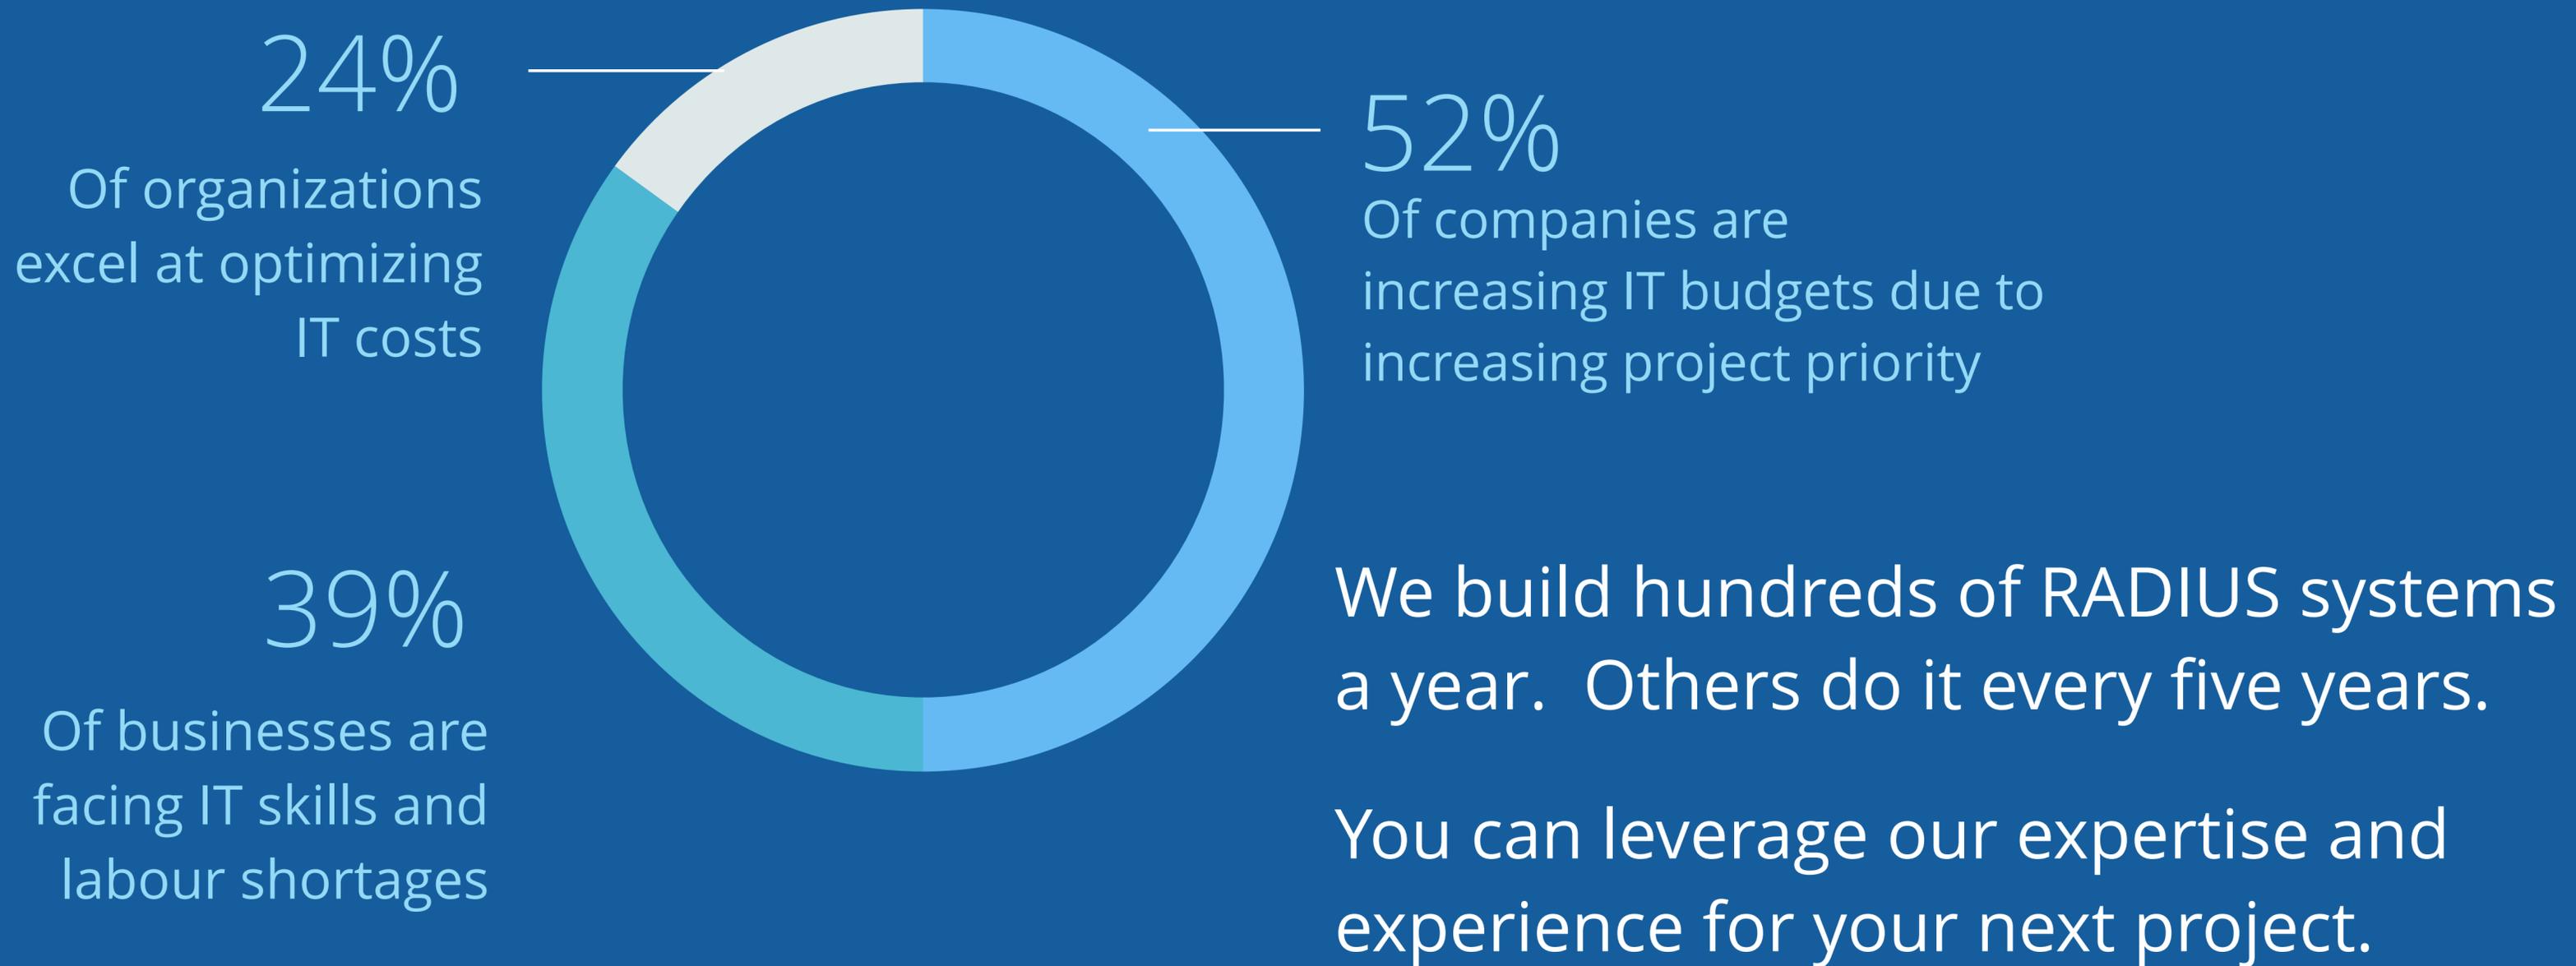

# THE INTERNET IS BUILT ON OUR PRODUCT

## WE SUPPORT THE INTERNET. WE CAN SUPPORT YOU

- ▶ For over 25 years our team has been installing RADIUS solutions around the world.
- ▶ We lower the risk of RADIUS deployments by using a proven product.
- ▶ All architectures are supported: on premises, cloud-based, virtualized, and managed services.
- ▶ We design and build systems which meet or exceed all requirements.
- ▶ We provide 24/7 support to globally recognized brands.

# LOWER RISK IS LOWER COST

# USE CASES

## Telecommunications

ISPs rely on our product for a **stable and high performance** AAA system.

## Education

Authenticating millions of students **on the hour, every hour**, both local and eduroam.

## Enterprise

Control access for **a wide variety of devices** while scaling to globally distributed offices.

## Vendors

Cloud providers, network equipment companies, token card manufacturers, embedded systems **all use us** for their RADIUS product.

- Connect all users seamlessly and securely.
- no matter what devices they have, or what network equipment you have
- Our team can do it all, or just help with design
- 24/7 support, or fully managed services
- Integrate our solutions with any system: Active Directory, local SQL, cloud databases, etc.
- No change to your existing processes or data

# FULL LIFECYCLE SUPPORT

- **Our team of experts** will collect the requirements, design the solution, build it, and operate it for you.
- **A detailed design** allows us to meet requirements, and provide clear deliverables.
- **Fast and efficient** build process leverages our 25+ years of experience to minimize project risk.

## Gather

The requirements questionnaire ensures that the project is based on a solid foundation of data.

## Verify

We review the statement of **work** with you, to be sure that it meets your needs.

## Execute

We build, run, and support the entire system.

# Thank You
